Dear Sir or Madam,

Many thanks for your inquiry.

We obtain our chicken meat from EU-certified companies in Thailand. On every single FRoSTA package the information about the raw material origins are provided transparently. We visit our producers in Thailand regularly to convince ourselves of the quality of the raw material, the proper breeding of the animals, the processing and the working conditions of the employees. In this way we ensure that all process steps such as origin, feeding, breeding, slaughtering and processing meet the criteria we set.

According to the FRoSTA specification, the tender chicken breast is cut into pieces, seasoned, gently fried in pure sunflower oil, cooked and deep-frozen. We attach particular importance on the well-being of the animals. Improved husbandry conditions and the resulting good animal health are important prerequisites for this.

That is why we have decided that by 2026 all our FRoSTA chicken meat raw materials will meet the requirements of the "European Broiler Chicken Initiative" and are already working on their implementation.

We have already established points such as compliance with European animal protection laws regardless of the country of production, reduced stocking density, picking facilities and seating and are having these checked on site by independent third parties.

With best regards,

FRoSTA  
Aktiengesellschaft
